

## Password Reset Instructions

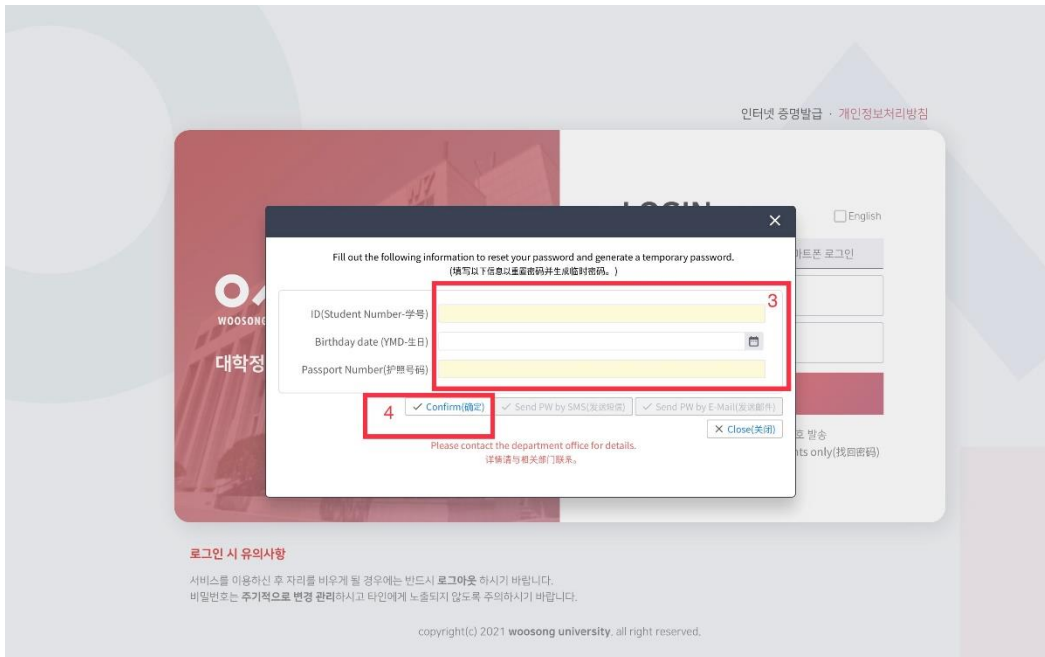

If you forgot your password and need to reset it, go to Woosong University infosystem at <https://wsinfo.wsu.ac.kr/>, and then follow the instructions below.

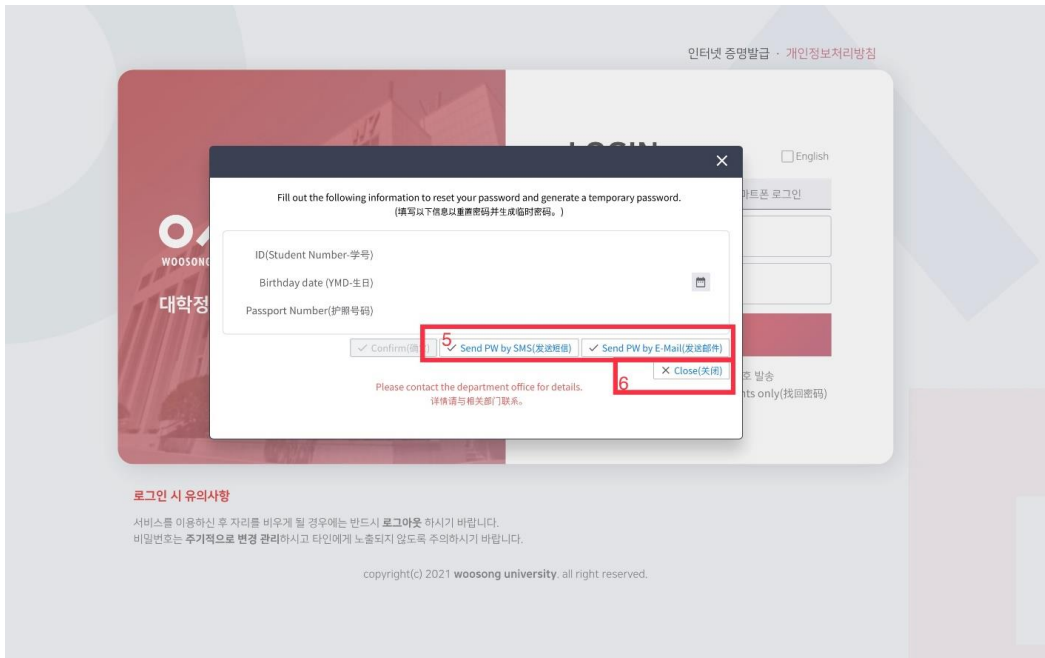

1. Choose 'Find password for foreign students only'.

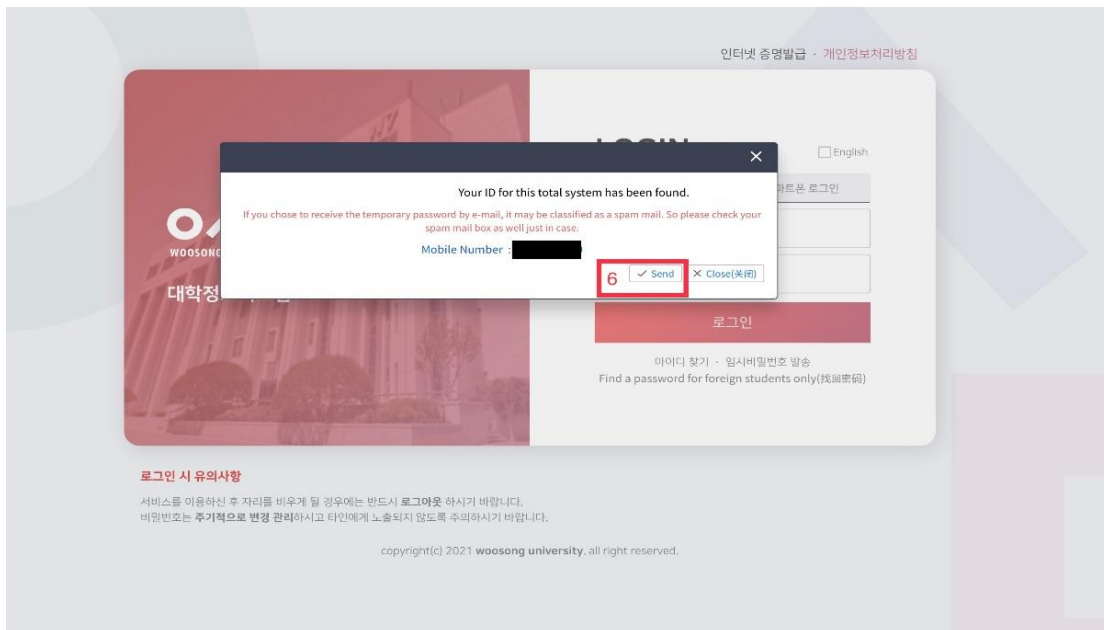

2. Choose 'Agree' to the Personal Information Usage Agreement (Student).

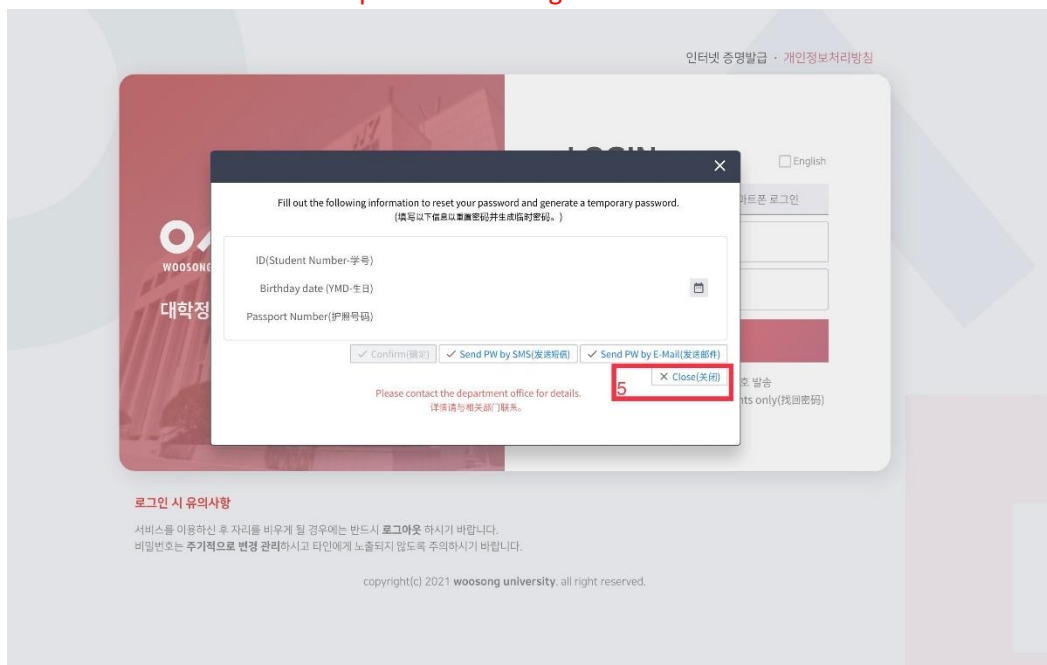

3. Fill the boxes with the required information. **Make sure it is the same as it is registered in infosystem. This is probably whatever you gave at the time of your admission as a freshman.**
4. Choose 'Confirm'.

5. If the given information is correct, you will then be able to choose to receive a one-time password, either by email or telephone number. Select whichever is best for you.
6. Choose 'Close'.

7. Choose 'Send' for a one-time password to be generated.

8. You will receive a one-time password to your phone number or email (whichever you selected). You can use your student ID and the new received password to enter the system.

Once you enter the system, you will be able to reset your password to one that you want. Choose something you will remember and take a note of it before leaving the system.

If the information in the infosystem is not correct or you cannot remember it, you may need to contact the International Administrative Center (W19 218) to help reset your password.
